PERSONAL PROTECTIVE EQUIPMENT - PPE

T. +44 (0) 7791 481864

Personal protective equipment (PPE) is equipment intended to protect the user from health and safety risks at work.

The Personal Protective Equipment Regulations 1992 define personal protective equipment (PPE) as “all equipment (including clothing affording protection against the weather) which is intended to be worn or held by a person at work, and which protects the person against one or more risks to that person’s health and safety”.

To understand PPE and how it can be used safely and effectively, we must first understand the hierarchy of controls. The hierarchy of controls is a system used in occupational health and safety.

Who is this training for?

This course is for any person or organisation in the UK that provide and use PPE within the workplace. This training provides both employers and employees with information on their duties from current legislation
